Setup ANDROID APP for Versa Pro

Download ANDROID STUDIO here

<https://developer.android.com/studio>

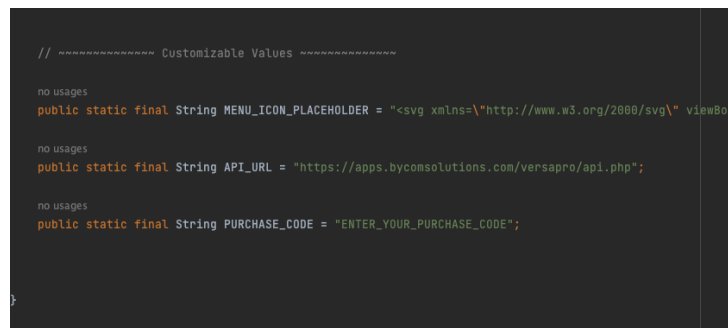

Install and do the initial procedure.

Now, Extract VersaPro_Android_App.zip

Open Android Studio and Location the extracted folder

Open the Project and wait until Android Studio downloads all necessary libraries.

Find **Constants.java** (`java/com/bycomsolutions/versapro/serializables`)

Modify : **API_URL** to (`https://yourdomain.com/app/api.php`)

Add your **PURCHASE_CODE**

Change APP NAME and PACKAGE NAME

Find **strings.xml** in (`res/values/`)

Replace `app_name` string

```

<resources>
    <string name="app_name">VersaPro</string>
    <string name="open_drawer">Open Drawer</string>
    <string name="close_drawer">Close Drawer</string>
    <string name="play_store_developer_link">https://play.
    <string name="settings">Settings</string>
</resources>

```

Replace package name in **build.gradle** (app)

```

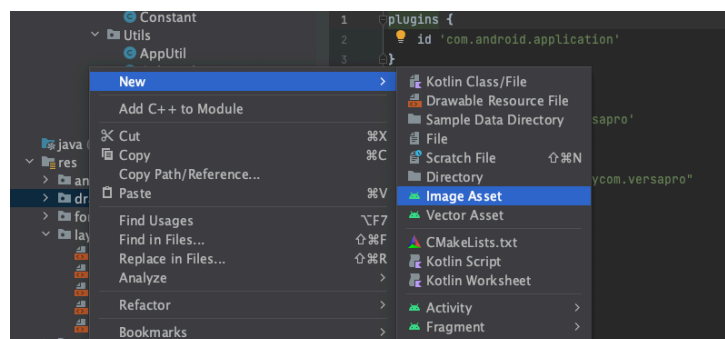

defaultConfig {
    applicationId "com.bycom.versapro"
    minSdk 24
    targetSdk 33
    versionCode 1
    versionName "1.0"
}

```

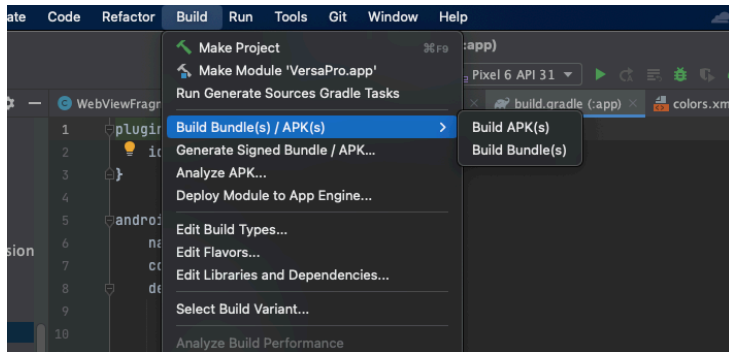

Replace **"com.bycomsolutions.versapro"** with **"com.yourdomain.app"**

Change APP ICON/SPLASH

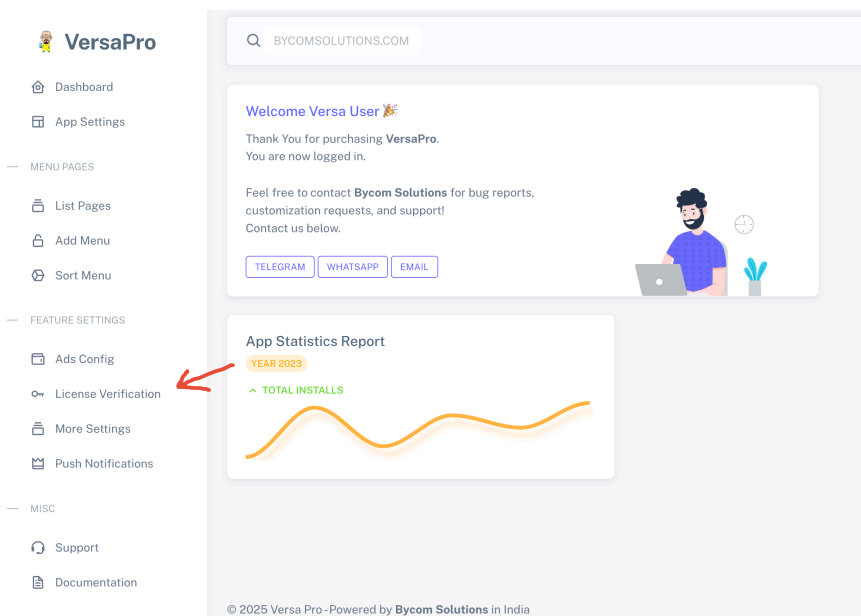

Right click on drawables (res/) and click New , select Image Asset and Upload your own logo/icon

Build APK

ACTIVATE YOUR APP WITH PURCHASE CODE

Choose your source, enter purchase code and packagename .

Click Save data and then **ACTIVATE**

License Settings

Activate ONCE carefully. Contact Support if you have issues.

PURCHASE SOURCE

BycomBazaar

PURCHASE CODE

INSERT_PURCHASE_CODE_HERE

PACKAGE NAME

com.company.appname

Save Data

Activate

If done properly, you will receive a success alert. You are good to go.

Add content and publish your application.

FREQUENTLY ASKED QUESTIONS

▼ APP NOT CONNECTING TO SERVER?

Check if you have entered correct purchase code on the admin panel (<more settings>) as well as the android app (<constants.java>)
