

2. Import Newsfreak Assets

2.1 Import Json File

From the **main_files/wp** folder, you will get a **newsfreak.json** file. From your WordPress Admin Dashboard,

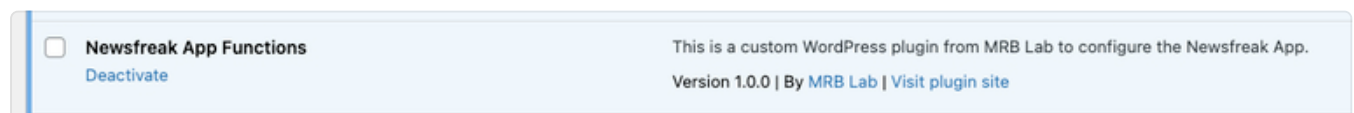

Go to the **Pod Admin > Import/Export Packages > Import** and upload the **.json** file and click on continue.

2.2 Import Newsfreak Plugin

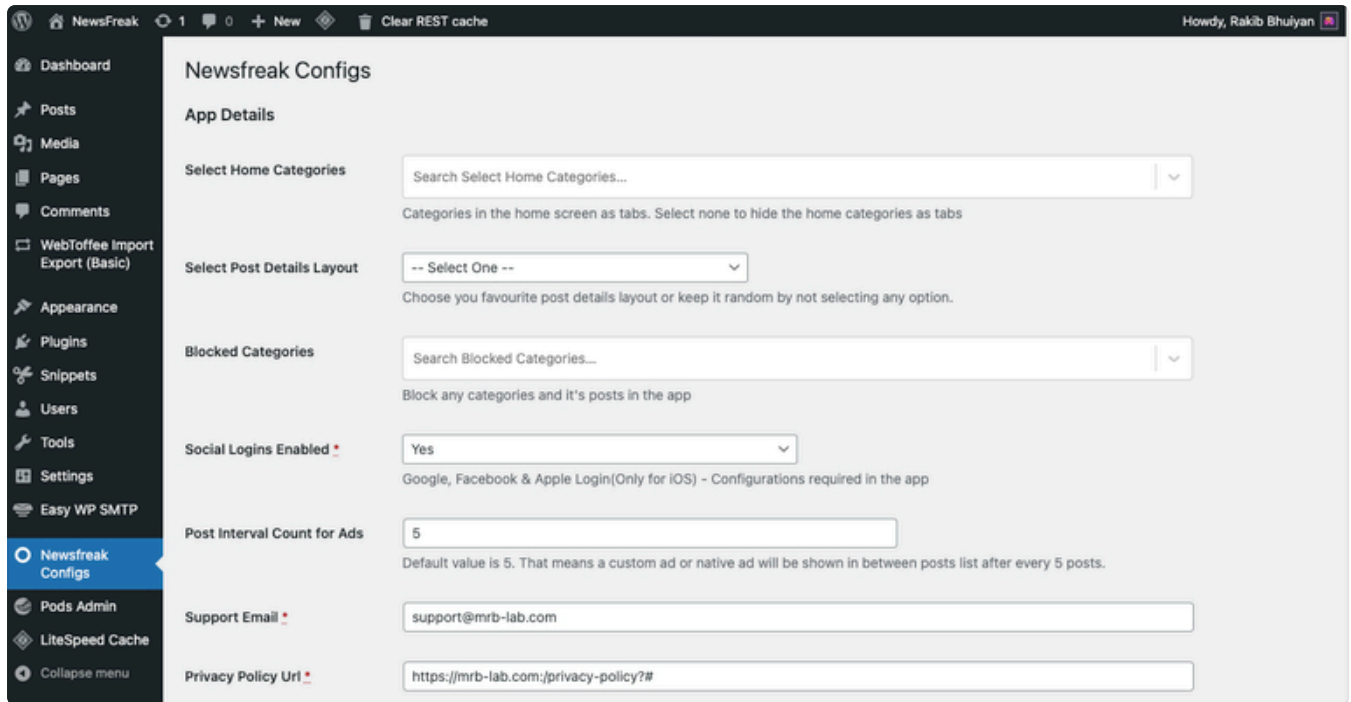

From the **main_files/wp** folder, you will get a **newsfreak.zip** file.

Go to your **WordPress Admin Dashboard > Plugins > Add New > Upload Plugin**.

Upload the plugin and activate it.

After that, You will see a **Newsfreak Configs** option at the left bar of your WordPress admin dashboard. You can control and customize the app with that. Add your app details and save the configurations.

Newsfreak Configs
