

3. Push Notification Setup

We have used Onesignal push notifications which use Firebase. With this, you can directly send notifications from your WordPress admin dashboard. You need to create a Firebase project for that.

1. First, go to the [Firebase Console](#) and sign in with your email account and go to the console.
2. Then Create A project by your app name.

✕ Create a project(Step 1 of 3)

Let's start with a name for
your project [?]

Project name

your-project-name-b8620
